Katedra

office desk

designed by: 

Like a boss

Usually you have to connect a phone to a charger or a computer to charge it. If you're running low on battery and you don't have either of those with you, Katedra desk is the answer, you can just place your mobile on the desk's surface to power it automatically. This eliminates the hassle of cables and chargers on the desk and leaves space for creative mess.

Katedra office desk is a triumph of contrast; a large white surface leans onto a solid wood block that mimics stacked beams. The block has three push-to-open drawers and the desk itself is made out of Kerrock, which is fully recyclable. Its large working surface has a built in wireless phone charger AirCharge, so your phone will never run out of juice while you are working. The charger is connected to the LED-charging

indicator, which is flashing white when in stand-by mode and turns red when you place your phone on it. When the phone is fully charged it turns green. Katedra desk is therefore a technologically advanced piece of office furniture with high aesthetic value that joins natural elements and technology and will definitely be a centerpiece of any modern office or co-working space.

Find your perfect match

Kerrock plate is antibacterial, non-porous, simple to clean, resistant to mechanical impact, flexible and easy to use and most importantly, pleasant to the touch, while the drawer beneath it is available in six different types of solid wood.

Maple

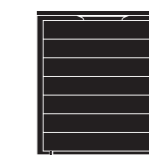

Beech

Desnahemisfera

Sometimes being successful is more than just about strategy, it's also about what feels right and finding the right people. If we were to boil it down our philosophy is this: We believe that if you are aware of your limits you will most likely stop there! So we have a profound commitment to find innovative design solutions beyond the borders of the things we know and we are used to! We try extremely hard to do this for people we enjoy, with products we believe in and having fun while we are at it.
